SERVICE STATISTICS

•*Assignment Backlog Update* — Beginning this month, we are refining our statistics with regard to patent asssignment documents. The Assignment Branch receives such documents through two channels: documents which are submitted with the original application (shown as "New Applications") and documents which are mailed in separately and go to the Assignment Branch directly from the Mail Room/Finance (shown as "Mail Room Recpts.")

As indicated in the new statistics, the current turnaround time for recording assignments submitted with new applications is much longer than that for recording assignments directly from the Mail Room/Finance. Further review showed that this wide variation was caused by incorrect placement of "Mail Room Recpts" at the front of the assignment recordation process. We are continuing to enforce the PTO policy of handling assignments on a first-in/first-out basis, regardless of the source of the document to be recorded.

•*Delays in Patent Products* — As a result of the increased production by the Examining Corps, far more patents are being printed in each issue than planned. Whereas issue sizes normally contain 1800 patents, they currently contain about 2200. This increase temporarily exceeded the capacity of the PTO's contractor who captures the data and creates the tapes for the printing process. In response to the increased workload, the contractor has opened a third plant, and has employed a sub-contractor as a fourth plant.

The Official Gazette is expected to be back on schedule in August, with patent copies being on schedule by November. In the meantime, a copy of the preliminary proof of the patent section of the Official Gazette, which contains the patent text, is being made available in the Patent Search Room on issue date. Also copies of the preliminary proofs of the patents in the issue, along with the associated drawings, are being made available in patent number order in the Patent Search Room as we receive them.

HELPFUL HINTS

•*Use of Courier Services* — Recently, it was brought to our attention that attorneys and/or applicants mailing documents to the PTO under the provisions of the Express Mail Rule (37 CFR 1.10), may have to spend considerable time taking the documents to the Post Office or waiting in long lines at the Post Office.

To avoid these inefficiencies, you may want to consider using a private courier (i.e., Federal Express, Purlator, or others) who would come to your office, pick up the document, and deliver the document to the PTO the next business day. One drawback to this service is that the provisions of the Express Mail Rule *do not* apply to these couriers. Therefore, the filing date for documents sent via a private courier is the date that the document is received in the PTO. If the document is sent under the provisions of the Postal Services Express Mail, the filing date is the date the document is deposited in the Post Office.

If you plan to send a document via a private courier, the following address should be used to insure proper receipt and handling:

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.
